

Effective February , 2020 Chemos completed expansion

February 2020, Altdorf

In February 2020 construction of the new lab and production area has been completed. The new area is equipped with a state of the art ventilation system generating overpressure to avoid dust contamination. In addition an

- ESD flooring
- Biometric access control
- Several gas supply
- Laminar flow ISO 5
- Lab equipment in stainless steel
- Several production vessels in pharma and food quality

has been installed. Outside dangerous warehouse will be ready by May 2020.

The new lab and production area will enable us to further focus on our customized solution activities for pharma and food. Our research customers will benefit from an extended range of high quality analytical reagents produced and tested according European pharmacopeia, explains René Gräwe CEO of Chemos.

Information regarding Chemos

Chemos® is a leading supplier of ready to use solutions for the lab and chemical industry. We are producing reagents and standards for the analytical lab and supplying raw materials for the chemical and pharmaceutical industry. The base of our solutions are a portfolio of ~ 200.000 raw materials where ~ 50.000 are already available for R+D ready to order in our shop. We are supplying and producing lab quantities from tiny quantities up to 100 metric tons for worldwide shipping.

We are the specialist when you require complete new raw materials or hard to find products with a dedicated specification. Through our network of custom manufacturing companies and our own customizing capabilities, we could offer raw materials and ready to use solutions as requested. Our extended service portfolio around product supply and documentation like safety data sheet service is a unique combination and our offer to you.

Chemos® Solutions through service is the base of our activities. We are a service provider with manufacturing capabilities. We continue where other will stop since more than 24 years. Take advantage from our experience and contact us.
